

KUNAL SAINI

Data Scientist | ML Engineer | AI / GenAI Engineer
8171206713 • kunalsaini6841@gmail.com • Amroha, UP • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Data Scientist with 2.5+ years of experience building ML models, AI pipelines, and GenAI applications. Proven track record in cybersecurity threat detection (97% accuracy), RAG-based chatbots, and end-to-end ML systems using Python, LangChain, and cloud platforms. Equally strong in classical ML, deep learning, and LLM fine-tuning.

EXPERIENCE

Data Scientist | Silver Touch Technology — Delhi

Oct 2025 – July 2026

- Built ML-based DNS threat detection system (Decision Tree, Random Forest, Logistic Regression + SHAP explainability) to classify trusted/suspicious DNS activity.
- Developed Advanced Threat Detection system analyzing honeypot PCAP traffic via Zeek & Suricata, achieving 97% prediction accuracy for network intrusion detection.

Associate Data Scientist | Platify Technologies Pvt. Ltd. — Noida

Sept 2023 – Sept 2025

- Built a RAG-based Intelligent Financial Assistant using LangChain, GPT-4o, and Pinecone with real-time query handling, text chunking, and re-ranking for context-aware responses.
- Developed and deployed ML models (classification & regression) achieving 85–90% accuracy; automated feature engineering pipelines, cutting processing time by 40%.

KEY PROJECTS

Intelligent Financial Assistant (RAG Chatbot) — Python · Flask · LangChain · GPT-4o · Pinecone

- Built end-to-end RAG pipeline using LLMs and LangChain to answer financial queries accurately.
- Connected a domain-specific knowledge base to a vector database and retrieved relevant context at query time, grounding the LLM's responses without any fine-tuning, improving accuracy and user engagement.

Advanced Threat Detection using Honeypot PCAP Logs — Python · Flask · Zeek · Suricata · Malcolm · Scikit-learn

- Analyzed honeypot-generated PCAP traffic using Zeek & Suricata for feature extraction; built ML classification models to detect malicious network activity achieving 97% prediction accuracy.

TECHNICAL SKILLS

Languages: Python, SQL

ML / DL: Regression, Classification, Random Forest, AdaBoost, KNN, KMeans, PCA, ANN, CNN, LSTM, GRU, Transformers, BERT, TensorFlow 2.19, PyTorch, Keras

NLP & GenAI: LangChain, LangGraph, RAG, Prompt Engineering, LLM Fine-Tuning (PEFT / LoRA / QLoRA), HuggingFace, Pinecone, FAISS, GPT-4o, LLaMA

Cyber Tools: Zeek, Suricata, Malcolm

Cloud: AWS Bedrock, AWS SageMaker

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SciPy, Flask, Streamlit, NLTK

Dev Tools: VS Code, Jupyter, PyCharm, Git, GitHub

EDUCATION

B.Tech – Computer Science & Engineering 2019 – 2023

ITS, Institute of Technology and Science, Greater Noida | CGPA: 7.41

CERTIFICATIONS

Python Bootcamp: Zero to Hero in Python — Udemy (Dr. Angela Yu) · June 2020

The Complete SQL Bootcamp — Udemy (Jose Portilla) · August 2021

Machine Learning A-Z — Udemy
